G10 EVO

For the freshest coffee

EVOCA
GROUP

DESIGN AND ERGONOMICS

- Available in three colours – **white, black and copper** – G10 evo is an even more innovative version of its predecessor, the G10
- A perfect **mix of design and cutting-edge technology**: it's elegant, clean and has contemporary lines
- The aluminium body ensures a huge visual impact and great durability
- Not to mention the flexibility for the barista to choose from two grinding options: including the exclusive and patented Dose on Demand mode
- If you're looking for grinding perfection, look no further than G10 evo!

A SMART USER INTERFACE

- An extremely **user-friendly** and **intuitive** interface:
 - The on-board **4.3” touchscreen** makes setting up this grinder an easy operation
 - You can select the language in use, check and manage the dose counter, make a back-up of its parameters or even set alarms for the cleaning cycle and blade replacement
 - Also, thanks to the rear USB port, you can transfer parameters, upload software updates and customised images – you can even display your own logo

GRINDING PERFECTION

- With double or single doses at the touch of your filter holder, G10 evo is a **quick and efficient fresh coffee grinder**
- It is equipped with **long-life flat steel blades**, which ensure the greatest precision (0.002mm) and the highest wear resistance
 - Thanks to its high carbon and chromium content, these discs can grind up to about 1,200kg of coffee
- The G10 evo is also fitted with brand-new **Dose Consistency System** (DCS) technology, which is designed to achieve the greatest regularity, consistency and accuracy ever, in each coffee dose

GRINDING PERFECTION

- Grinding the coffee just before brewing is the key to the best possible espresso, preventing the coffee from oxidising and losing its aromas and nuances
- With G10 evo you can benefit from **two grinding solutions**:
 - The patented **Dose On Demand**, which is ideal for locations with high consumption peaks, automatically pre-grinds the next coffee dose 
 - Thanks to the **Grind On Demand** solution the dose is instantly ground and dispensed just before being served 

AN EYE-CATCHING DESIGN

PRODUCT RANGE & SPECIFICATIONS

Feature	Description	Product Code
Colours	Copper	PGC051A
	White	PGC051H
	Black	PGC051N
Dimensions	193 x 369 x 629mm (W x D x H)	
Net Weight	16kg	
Hopper Capacity	1.2kg	
Long-life Grinding Blades (Ø)	64mm	
Power	525W	
Revolutions	1250 RPM / 50 Hz	
Grinding Output	2-3 grams per second
