

VIVACE

Product Presentation

Highlights

- ENVIRONMENTAL CARE
 - R290 gas refrigerated unit reduces carbon footprint
 - Lower noise emissions
- ENERGY EFFICIENCY
 - Significant reduction in energy consumption (over 45%) compared with Melodia
 - C Class energy rating (best in class performance) according to the latest European Energy regulation
- Compatible with Breasy* touchless payment app
 - * Available 2022

Tray Innovations

- V-Flex System:
 - Easy to re-configure vertical layout with new quick release guides
 - No tools and less time needed to configure the machine
 - Place guides every 1cm instead of every 2cm

High Visibility Cabinet

- Internal white cabinet
- Improved visibility of products inside the cabinet
- More attractive product proposition

Energy Efficiency and Refrigerant Technology Deadlines

2 Regulations, 2 Deadlines: both met with the introduction of Vivace

R290 Technology FAQ

R290 based cooling technology is extremely efficient in terms of energy consumption. How much can lower consumption save in Euros?

We can save up to €238 per year for each Swing Snack vendor (vs Tango Snack)*

* Swing quoted for illustration only

Do I need to make any modifications in my warehouse in order to stock Impulse models which operate with a R290 cooling unit?

Any company that operates within existing Safety legislation can stock the machine safely, thanks to the small quantity of gas contained in each machine. However, the presence of these specific models should be taken into consideration when updating risk assessment documents for warehouses and production plants.

What quantity of R290 gas is contained in the refrigerated unit?

The quantity of R290 gas contained in a Vivace cooling unit is 150g i.e. the same quantity as contained in five cigarette lighters

How safe is the transportation of such Impulse machines?

According to UN2857 legislation only machines which contain more than 12 Kg of a Class 2 gas (such as R290) have to comply with ADR Legislation, meaning our models can be transported without considering these rules. Full truck or full container loading is safe.

Temperature Configurations

50% SNACK 8-12°C

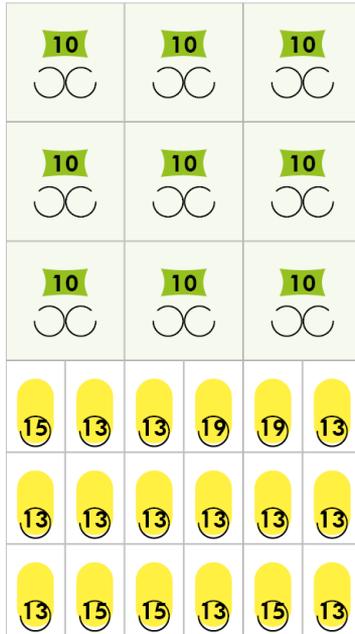

50% C&B 5-7°C

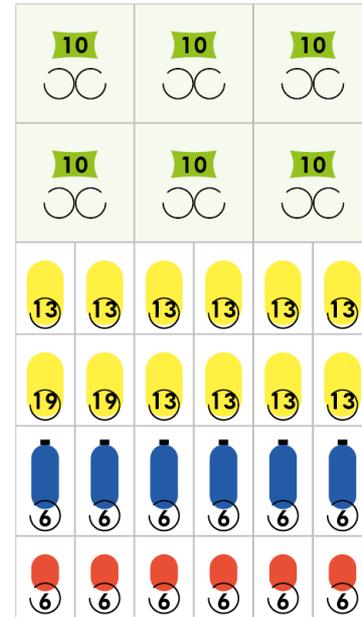

100% SNACK 8-12°C

Machine Layouts

Vivace Snack 6-27
(9E0553-1 & 9E0554-1)

Vivace Snack, Can & Bottle 6-30
(9E0553 & 9E0554)
